Package Feature

Web Connect

Web Connect+

eConnect

eConnect+

Option to continue using and/or enable new API connectivity for low/no touch TMS collaboration:

- Real-Time Rating
- Spot Market
- Billing (Rate Change Request)
- Communications (Load) API

Any of your SCACs/VATs already implemented or in flight for API services on the BluJay Carrier Network will automatically become part of your e2open Carrier Marketplace profile. See below for options to purchase applicable implementation services for additional APIs or SCACs/VATs as needed.

Optional Premium Marketing package available for purchase

New EDI Implementation Services (if needed) per SCAC/VAT

\$3,000

\$3,000

New Real-Time Rating API Implementation Services (if needed), first SCAC/VAT

Shippers request bids when applying a routing guide or shopping for rates from carriers. The TMS pings the carrier's endpoint and expects an instant response. If not already using version 11 of the e2open Transportation Management for shippers EDI 204 (Load Tender) message, the carrier has the option to upgrade to that version to receive, in the L11 segment of the 204, the unique bid identifier that was submitted with the related bid via the Real-Time Rating API.

\$4,125

New Spot Market API Implementation Services (if needed), first SCAC/VAT

Shippers post loads to the SpotMarket to retrieve bids on loads that they need covered. Carriers will ping the e2open endpoint to retrieve all available SpotMarket postings and then choose the postings for which they want to submit bids.

\$4,125

New Billing (Rate Change Request) API Implementation Services (if needed), first SCAC/VAT

Carriers can request rate changes to add accessorials or modify base rates by submitting requests via integration. This allows carriers to post requests to an API endpoint to add, remove, or modify changes for a rate change request or request a base rate adjustment. Carriers can only submit requests for loads tendered to their company, and shippers' rate change request rules are enforced.

\$4,125

New Communications (Load) API Implementation Services (if needed), first SCAC/VAT

Integrates a range of load functionality, including the retrieval and addition of load notes as well as the retrieval of current rate, stop ID, dates, and lading quantity. The load note functionality specifically works by allowing carriers to retrieve and add notes to a load and post load documents.

\$4,125

New API Implementation Services (if needed) per additional SCAC/VAT

\$1,000
